Your true Fortune

Every human being, subsequently every organization and every system, has an «inner technology», an inner system, which is also called the self. This self consists of levels in terms of structure and impact, that is scientifically still only very modestly researched. To the extent that the focus is directed towards the external, the human being loses the

connection to this internal unique asset, which I also understand as «the true fortune». Since at the same time unconsciously also reducing programs work in the human nature, so this fortune is continuously diminished without countermeasures, with which the life mutates to the functioning and the holistic success to the prison of its self. We don't want that, and that's why it's so important to invest in our own «inner technology» at least as actively as we invest in modern technology, from new devices and production machines to digitalization and artificial intelligence. Accordingly, we gain more access to our own development, which has an essential effect on the quality of life and the holistic success also in the company. This enables greater satisfaction and prosperity for all.

Human and other Programming

This «inner technology» plays each its own song, which is composed of human (e.g. habit, trauma), systemic (e.g. family, industry) and superordinate (e.g. primal fear, life destination) programs. Bettina Fischer has perceived these different programs intuitively since childhood, and later additionally through education (e.g. astrology, numerology) also mathematically. She also knows how to re-program them (e.g. biochemistry, neuroscience) and how to create more of the consciously intended reality (e.g. quantum physics). If one recognizes the unconscious programs, also called patterns, one recognizes the true facts and ways of unfolding in times that this counts more than ever.
